The Practitioner's Guide to Mirroring Hands

A client-responsive therapy that facilitates natural problem-solving and mind-body healing

Richard Hill and Ernest L. Rossi

Describes in detail how Mirroring Hands is conducted, and explores the framework of knowledge and understanding that surrounds and supports its therapeutic process.

Foreword by Jeffrey K. Zeig.

Mirroring Hands is a practical therapeutic technique that can be utilised by all practitioners for the benefit of their clients. With a tranquil state of focused attention as the starting point, the practitioner invites the client to explore an issue by projecting it into their hands; with one hand representing the difficulty or disturbance, the other becomes the natural container for the opposite reflections – resolution, ease and comfort. This enables the client to engage with their deeper therapeutic self and connect to the natural flow, cycles and self-organising emergence that shift the client toward beneficial change.

The Art of Hypnosis – Third Edition

Mastering basic techniques

C. Roy Hunter

This updated third edition includes a new introduction by Conrad Adams together with a revised first chapter.

Roy Hunter is an expert in the field of hypnosis. He was specially selected to carry on the work of the 'Grand Master of Hypnotherapy', the late Charles Tebbetts, who was a master teacher of the art/science of hypnosis and hypnotherapy. This book is based upon the training courses of Tebbetts, which have been updated by Roy Hunter. Tebbetts' training has formed the basis of a large number of hypnotherapy courses taught both in America and Europe.

The Art of Hypnosis is well-written and easy to read and understand, even for the novice. In-depth and practical information is given on how to achieve maximum results in a hypnotic session by phrasing suggestions properly and by using various techniques to determine which approach is best for each individual client.

C. Roy Hunter teaches professional hypnosis and advanced techniques for professionals and teaches self-hypnosis to groups and clients for personal or professional motivation. He was specially selected to carry on the work of the late Charles Tebbetts.

Charismatic and possessing a profound ability to bring out the best in people, [Tad James](#) is a staunch believer in the inexhaustible inner potential of human beings. He is an exciting, dynamic transformational seminar leader, and a pioneer in the field of NLP.

Hypnosis

A comprehensive guide

Tad James with Lorraine Flores and Jack Schober

Research shows that many people react differently to different types of hypnotic induction – yet many hypnotherapists are confined to using only one technique.

This practical book makes three radically different types of hypnosis easy to use in daily hypnotic work, exploring the methods of Milton H. Erickson, George Estabrooks and David Elman, presenting them in such a way as to allow a clear and accessible understanding. A resource for all students, trainers and therapists, it includes a range of powerful scripts for improved hypnotic work.

An excellent introductory text for students beginning to study the art and science of hypnosis. For those already knowledgeable about hypnosis, there are many nuances that will enable you to increase the elegance of your work.

Generative Trance

The experience of creative flow

Stephen Gilligan

Offers a framework for developing a more creative consciousness and lays out the step-by-step processes by which this can be done.

In *Generative Trance* renowned trainer Stephen Gilligan shows you how to harness the relationship between the unconscious and the conscious mind for a much more powerful and effective therapeutic intervention, and reveals how life can be lived as a great journey of consciousness.

Emphasising that reality and identity are constructed by ourselves, Gilligan explains how generative trance is crucial in creating new realities and possibilities for clients. It is a view that differs markedly from the traditional hypnosis ideas of a client losing control, as well as from Ericksonian approaches that feature a benevolent hypnotist who bypasses the conscious mind to work with a client's unconscious mind. Instead, generative trance stresses a 'disciplined flow' process in which a person's conscious and unconscious minds cooperate to weave a higher consciousness capable of transformational change.

Stephen Gilligan has become a leading figure in Ericksonian hypnotherapy. He is the developer of the Generative Self approach to personal growth. A licensed psychologist, Stephen maintains a private practice in Encinitas, California.

Ericksonian Approaches – Second Edition A comprehensive manual

Rubin Battino and
Thomas L. South

The most comprehensive manual on
Ericksonian hypnotherapy yet published.

It is a thoroughly practical resource that assumes no previous knowledge of the field and develops the reader's understanding. Includes: the history of hypnosis; myths and misconceptions; traditional vs non-traditional inductions; basic and advanced inductions; language forms; utilisation of ideodynamic responses; hypnotherapy without trance; basic and advanced metaphor; and much more.

In the words of Roxanna Erickson Klein, 'This work is the stately tree, supporting individuality, cooperation and diversity. It is filled with common sense and uncommon sense, with atmosphere and sunshine, with metaphors for more individual growth, with practice exercises for the present and with thoughts for the future.'

A CD of exercises is also available,
ISBN 978-184590029-8.

Rubin Battino has a private practice in Yellow Springs, Ohio, and is an Adjunct Professor for the Department of Human Services at Wright State University.

Thomas L. South has a PhD in clinical psychology and has taught courses in Ericksonian hypnotherapy at the University of Dayton and at Wright State University.

Scripts and Strategies in Hypnotherapy

The complete works

Roger P. Allen

Recently updated, this book presents a comprehensive source of scripts and strategies that can be used by hypnotherapists to build a successful framework for any therapy session.

It is designed to be of assistance to all therapists as they unlock the possibilities that exist for their clients and help them make significant and beneficial changes to their perceptions and beliefs. Upon compiling it, Allen's ultimate aim was to provide practitioners with the best toolkit of strategies possible, replete with a variety of practical scripts to serve as the basis for their interventions, derived from his own experiences as a therapist.

All of the scripts can be used as they stand, or adapted as necessary for specific situations and for client-specific needs and concerns.

Roger P. Allen is a practising hypnotherapist based in Portsmouth, UK. He constantly seeks to improve therapeutic practice by integrating into his sessions a wide range of established and experimental techniques and theories.

101 Things I Wish I'd Known When I Started Using Hypnosis

Dabney M. Ewin

This simple but immensely powerful book is a testament to all the ideas that Dabney Ewin wished he had known about when he first starting practising hypnosis.

He has sought to make this publication as little as possible, consistent with the message of seeking to take a complicated idea and presenting it in the simplest way.

The words and phrases are designed to give any beginning or experienced student a foundation about the working of hypnosis. Divided into five sections, along with a comprehensive reference section for further reading, this book can be taken one page at a time from the beginning or browsed through randomly.

The US version of this title has a different cover.

Dabney Ewin is a Clinical Professor of Surgery and Psychiatry at Tulane University Medical School in New Orleans, Louisiana. An adjunct Faculty member and practising physician, Dabney has taught hypnosis at Tulane since 1970. He is also Clinical Professor of Psychiatry at Louisiana State University Medical School.

Hypnotic Language

Its structure and use

John Burton and
Bob G. Bodenhamer

The use of language lies at the core of most hypnotic interventions. In this remarkable book, the authors build on Erickson's approach and develop it considerably further. This is amply demonstrated by means of scripts and case studies ensuring a comprehensive understanding of the techniques involved.

Understanding Advanced Hypnotic Language Patterns

A comprehensive guide

John Burton

This book is the sequel to the critically acclaimed *Hypnotic Language*.

In this new volume the author provides more depth and also elaborates on the concepts that comprise hypnotic language.

The Art of Hypnotherapy

Mastering client-centered techniques

C. Roy Hunter

Now in its fourth edition, this classic text is a comprehensive guide to the practice of client-centred hypnotherapy. It shows students how all hypnotic techniques revolve around four main therapeutic objectives: suggestion and imagery; discovering the cause; releasing; and subconscious relearning.

The Art of Hypnotic Regression Therapy

A clinical guide

C. Roy Hunter and Bruce Eimer

This volume removes the fear of the dangers of mishandled hypnotic regression therapy (HRT) by presenting an organised, client-centred approach. You will learn when and how to use HRT effectively to help clients discover and release the causes of their problems and symptoms.

Harry the Hypno-potamus Metaphorical tales for the treatment of children

Linda Thomson

Harry the Hypno-potamus is a collection of metaphorical stories that deal with a variety of physical and behavioural problems faced by children. Embedded in each story is a metaphor as well as hypnotherapeutic techniques that can be used as part of a comprehensive approach to the diagnosis and treatment of a host of disorders both physical and emotional. The 32 stories in the book are all about different animals that live in the Ashland Zoo.

A set of cards is also available, see page 23.

Harry the Hypno-potamus More metaphorical tales for children – Volume 2

Linda Thomson

This second book of metaphors for children will entertain and delight while the therapeutic message, cleverly embedded in the story, slips into the unconscious mind of the child. The tales enhance empowerment by exposing children to new possibilities, new perspectives and differing philosophies. For the clinician, the metaphors offer a treasure trove of techniques and hypnotic language that can be adapted for a variety of situations and problems.

The comprehensive clinical guide

Danie Beaulieu

This is the first book to detail one of the most innovative and effective new treatments available to psychotherapists today. Filled with case examples and informed by extensive experience teaching the technique, it is accessible to informed laypersons, as well as to all readers with prior training in psychology.

Life Coaching

A manual for helping professionals

Dave Ellis

This manual is specifically designed for therapists, counsellors and other helping professionals who are looking to add life coaching techniques to their portfolio of skills. Dave Ellis has produced a step-by-step practical guide to turning your natural people-helping skills into a profitable life coaching business.

Subliminal Therapy

Using the mind to heal

Edwin K. Yager

Subliminal Therapy is a technique by which hypnotic phenomena can be used for therapeutic purposes without the need for formal trance induction and can be used either on its own or in addition to other treatment. In this book readers are introduced to the concepts and applications of Subliminal Therapy and are taught how to use it.
