Sweet Distress

How our love affair with feelings has fuelled the current mental health crisis (and what we can do about it)

Gillian Bridge

Cutting its way through the media frenzy, *Sweet Distress* puts emotional resilience centre stage.

Using an approach rooted in no-nonsense logic, author and psycholinguistic consultant Gillian Bridge delves into a range of problems which seem to be most frequently cited as sources of mental distress. These include stress, anxiety, depression, loneliness, body image, eating disorders, social media, substance abuse, behavioural disorders, academic pressures and bullying.

The author explores how these issues have contributed to turning life events that may, at other times or in other places, have been little more than nuisances or inconveniences into sources of genuine psychic pain.

Packed with realistic and effective takeaway strategies for parents and educators, *Sweet Distress* challenges under-researched but over-promoted ideology and shares evidence-based help and advice for anyone wanting to improve the mental health of those they care about.

Grow

Change your mindset, change your life – a practical guide to thinking on purpose

Jackie Beere

Demonstrates how we can all change our mindsets, learn to learn and choose to think on purpose.

Our thoughts and beliefs lead us to develop habits that can predict our success or failure. We can all choose to grow – and coach our loved ones to do the same – by fostering and sustaining a mindset that will keep us healthy and happy in future years.

Jackie Beere believes the key to this is thinking on purpose and metacognition. Jackie shows you how you can understand yourself and others so that you can be flexible, fearless and happy.

Life is full of changes and challenges but by thinking on purpose, we can all become more resilient, adaptable, self-confident and successful.

Jackie Beere, OBE is an Independent Thinking Associate who worked as a newspaper journalist before embarking on a career in teaching and school leadership. She was awarded an OBE in 2002 for developing innovative learning programmes and is the author of several bestselling books on teaching, learning and coaching. Since 2006, Jackie has been offering training in the latest strategies for learning, developing emotionally intelligent leadership and cultivating a growth mindset.

What to Do When It's Your Turn (And it's always your turn)

Seth Godin

A book about seeing the stuck, getting unstuck, and working within and swimming upstream in a system that often would prefer that you merely stand still.

It's about realising that it's your turn, always your turn, and understanding that once you see the opportunity, it's yours. Most of all, it's about freedom and our almost automatic insistence on avoiding it at all costs.

Written by bestselling author Seth Godin, *What to Do When It's Your Turn* is as thought-provoking as his other titles – but this book is different. Seth has pushed the boundaries once again, this time packaging his thoughts in a beautiful full-colour format to spread its message as far and wide as possible. It is a collection of short stories and essays that help the reader know 'what to do when it's your turn' in life.

Seth pushes us to dig deep inside so we can do better work and impact the things we care about – and his message is urgent, personal, in-your-face and as honest as he could make it.

Seth Godin is the author of 19 international bestsellers that have been translated into 35 languages. He's the founder of several companies, a member of the Direct Marketing Hall of Fame and an influential speaker around the world. He writes about treating people with respect, the changing economy and ideas that spread.

Chess Improvement

It's all in the mindset

Barry Hymer
and Peter Wells

An instructive and comprehensive guide that sets out how the application of growth mindset principles can accelerate chess improvement.

With Tim Kett and insights from Michael Adams, David Howell, Harriet Hunt, Gawain Jones, Luke McShane, Matthew Sadler and Nigel Short.

Foreword by Henrik Carlsen, father of world champion Magnus Carlsen.

Blending theory, practice and the distinct but complementary skills of two authors – one an academic (and amateur chess player) and the other a highly regarded England Chess Olympiad coach (and grandmaster) – *Chess Improvement* is an invaluable resource for any aspirational chess player or coach/parent of a chess player.

Barry and Peter draw on interviews conducted with members of England's medal-winning elite squad of players and provide a template for chess improvement rooted in the practical wisdom of experienced chess players and coaches.

Barry Hymer is Emeritus Professor of Psychology in Education at the University of Cumbria. He is one of the UK's foremost authorities on the educational applications of mindset theory.

Grandmaster and FIDE Senior Trainer Peter Wells has over 30 years' professional experience in the chess world and has authored or co-authored nine well-received chess books.

My Child's Different

The lessons learned from one family's struggle to unlock their son's potential

Elaine Halligan

Explores the enabling role that parents can play in bringing the best out of children who are seen as 'different' or 'difficult'.

In *My Child's Different* Elaine shares the true story of her son Sam, who by the age of seven had been excluded from three schools and was later labelled with a whole host of conditions – ranging from autistic spectrum disorder (ASD) to pathological demand avoidance (PDA), before finally being diagnosed with dyslexia. He had become 'the Alphabet Kid'. His family never gave up on him, however ...

Interspersed throughout the narrative are the reflections and insights of parenting expert Melissa Hood, who illustrates the key concepts from Sam's story and shares practical positive parenting techniques to help parents better connect with their children.

Suitable for parents, educators and anyone who works with children.

Also available as an audiobook.

Elaine Halligan is a director at The Parent Practice and has been a parenting specialist since 2006, helping parents raise competent and confident children through parenting classes, private coaching and keynote speaking in schools and corporate settings both in the UK and overseas. She is frequently quoted in the broadsheet press and regularly appears on Sky News, BBC world news and BBC local radio.

The Practitioner's Guide to Mirroring Hands

A client-responsive therapy that facilitates natural problem-solving and mind-body healing

Richard Hill and Ernest L. Rossi

Describes in detail how Mirroring Hands is conducted, and explores the framework of knowledge and understanding that surrounds and supports its therapeutic process.

Foreword by Jeffrey K. Zeig.

Mirroring Hands is a practical therapeutic technique that can be utilised by all practitioners for the benefit of their clients. With a tranquil state of focused attention as the starting point, the practitioner invites the client to explore an issue by projecting it into their hands; with one hand representing the difficulty or disturbance, the other becomes the natural container for the opposite reflections – resolution, ease and comfort. This enables the client to engage with their deeper therapeutic self and connect to the natural flow, cycles and self-organising emergence that shift the client toward beneficial change.

Richard Hill is acknowledged internationally as an expert in human dynamics, communication, the brain and the mind.

Ernest L. Rossi held a diploma in clinical psychology and was the recipient of three lifetime achievement awards for outstanding contributions to the field of psychotherapy.

Hypnosis

A comprehensive guide

Tad James with
Lorraine Flores and
Jack Schober

Research shows that many people react differently to different types of hypnotic induction – yet many hypnotherapists are confined to using only one technique.

This practical book makes three radically different types of hypnosis easy to use in daily hypnotic work, exploring the methods of Milton H. Erickson, George Estabrooks and David Elman, presenting them in such a way as to allow a clear and accessible understanding. A resource for all students, trainers and therapists, it includes a range of powerful scripts for improved hypnotic work.

An excellent introductory text for students beginning to study the art and science of hypnosis. For those already knowledgeable about hypnosis, there are many nuances that will enable you to increase the elegance of your work.

Charismatic and possessing a profound ability to bring out the best in people, [Tad James](#) is a staunch believer in the inexhaustible inner potential of human beings. He is an exciting, dynamic transformational seminar leader, and a pioneer in the field of NLP.

Stephen Gilligan has become a leading figure in Ericksonian hypnotherapy. He is the developer of the Generative Self approach to personal growth. A licensed psychologist, Stephen maintains a private practice in Encinitas, California.

Generative Trance

The experience of creative flow

Stephen Gilligan

Offers a framework for developing a more creative consciousness and lays out the step-by-step processes by which this can be done.

In *Generative Trance* renowned trainer Stephen Gilligan shows you how to harness the relationship between the unconscious and the conscious mind for a much more powerful and effective therapeutic intervention, and reveals how life can be lived as a great journey of consciousness.

Emphasising that reality and identity are constructed by ourselves, Gilligan explains how generative trance is crucial in creating new realities and possibilities for clients. It is a view that differs markedly from the traditional hypnosis ideas of a client losing control, as well as from Ericksonian approaches that feature a benevolent hypnotist who bypasses the conscious mind to work with a client's unconscious mind. Instead, generative trance stresses a 'disciplined flow' process in which a person's conscious and unconscious minds cooperate to weave a higher consciousness capable of transformational change.

Harry the Hypno-potamus Metaphorical tales for the treatment of children

Linda Thomson

Harry the Hypno-potamus is a collection of metaphorical stories that deal with a variety of physical and behavioural problems faced by children. Embedded in each story is a metaphor as well as hypnotherapeutic techniques that can be used as part of a comprehensive approach to the diagnosis and treatment of a host of disorders both physical and emotional. The 32 stories in the book are all about different animals that live in the Ashland Zoo.

A set of cards is also available, see page 58.

Harry the Hypno-potamus More metaphorical tales for children – Volume 2

Linda Thomson

This second book of metaphors for children will entertain and delight while the therapeutic message, cleverly embedded in the story, slips into the unconscious mind of the child. The tales enhance empowerment by exposing children to new possibilities, new perspectives and differing philosophies. For the clinician, the metaphors offer a treasure trove of techniques and hypnotic language that can be adapted for a variety of situations and problems.
