

The Killer Legendile

Along the deserted Indowie Isle,

Sneaks the killer Legendile.

His talons are as sharp as dragon claws,

He has poisonous teeth and exploding jaws!

His skeletal hazardous wings grow as he finds bones.

He outstretches his wings with a brip!

He moves his legs with a drockey!

He has ten eyes upon his back!

On each of these there grow five mythical Diamonds!!!

But if he drinks the throbbing cola from the Grobgrob River,

His Diamonds turn into spiky plates,

He shrinks until he has a tiny head,

He goes on all fours,

His wings fall off,

And now he's a blood-curdling Stegosaurus!!!!
